

## *Welcome to Our Prosthodontic Practice!*

At this office, *every* patient is special. It is our goal to help you experience the wonderful benefits of good dental health. Strong, good looking teeth enable you to eat better, look better and feel confident about your smile and yourself. A beautiful smile is a precious gift that you give everyone you meet for the rest of your life. We can help you have that smile.

Our practice embraces the areas of implant and reconstructive dentistry. This means that we are well trained and experienced to help people with missing teeth, worn out dentitions or unesthetic smiles. We delight in helping people achieve their goals of good oral health. At your first visit we will provide a thorough examination to assess your dental condition and allow enough time to thoroughly discuss your treatment needs and concerns. We feel that understanding your needs and concerns is a critical component of helping you achieve your dental goals.

In order to serve you better, all of the doctors at this practice are dedicated to advanced continuing education to ensure that we provide you with the most current dental treatment available. We are highly trained in all the latest dental procedures and techniques. Now, it is very common for people to ask us "What is a prosthodontist?" or "How are you different than other dentists?"

A prosthodontist is a dental specialist in the restoration and replacement of teeth. After completing four years of dental school, prosthodontists receive three additional years of specialized training in an accredited graduate education program. Their training encompasses all aspects of restorative dentistry with expertise in reconstructive and implant dentistry. Their treatment goal is to provide *comprehensive* dental care resulting in functional and esthetic restorations.

A prosthodontist's intensive advanced training allows them to work closely with other dental and medical specialists to provide the most comprehensive treatment options. Their training also provides them with advanced diagnostic insights, allowing them to treat prosthetically challenging situations.

Our mission is to create a warm friendly professional environment that provides the *highest* level of dental care available. We pride ourselves on the service we provide to our patients. If you ever have questions about your treatment or any other concerns, please ask or inform us. We will be pleased to assist you. I personally welcome you and look forward to working with you to create and maintain a properly functioning mouth as well as a beautiful smile.

Sincerely,  
Samuel Chiu, DDS & Sukhmani Singh, DDS
